Learn SaaS Release Notes - v2015.9.0

Looking for the latest release information? Check out the Blackboard Learn SaaS release notes feed.

Test environments were updated approximately February 12, 2016.
Production environments were updated approximately March 8, 2016.

Release Summary

This release contains about 50 bug fixes, focused on accessibility, localization, and the Ultra Course View.

Highlighted Maintenance Updates

Name	Description
Achievements Building Block	A bug in the Building Block denied Instructors access to the Achievements tool within the Original Course View. An updated version of the Building Block resolved this permissions issue.
Mobile (Ultra Course View)	External courses with a valid URL previously did not open correctly on an iPhone. This issue was resolved.
Tests (Original Course View)	A bug allowed a student user to have multiple submissions for a test, even if the test settings did not permit them. This bug occurred during testing when the student user accessed the test on multiple devices simultaneously. The bug was resolved.
Accessibility	Screen reader users were not able to use Grading Journals successfully. Heading tags and a drop-down menu were modified in multiple places to better inform the user about menu options and system location.
