## April 2014 Features

---

### Anonymous grading

Instructors can hide student names from submitted assignments for anonymous grading. To learn more, see [Instructor: Anonymous Grading](#) | [Student: Submit Assignments](#).

### Delegated grading

Instructors can delegate grading to specific users. To learn more, see [Instructor: Delegated Grading](#).

### Financial Aid Reporting

Generate reports of student academic contribution within a single or multiple courses in Blackboard Learn 9.1. To learn more, see [Administrator: Financial Aid Reporting](#) | [Instructor: Course Reports](#).

### Portfolio improvements

Portfolios are now accessed from the global navigation and have a new authoring canvas. Instructors can create portfolio assignments. To learn more, see [Administrator: Portfolios](#) | [Instructor: Portfolios](#) | [Student: Portfolios](#).

### SafeAssign integration

SafeAssign is integrated into regular Blackboard Learn assignments. To learn more, see [Administrator: SafeAssign](#) | [Instructor: Use SafeAssign in Assignments](#) | [Student: Assignments Using SafeAssign](#).

### Significant figures added to assessments

In calculated formula questions, instructors can select the number of decimals or significant figures for the correct answers generated by the system. To learn more, see [Instructor: Calculated Formula Questions](#).

### Student preview

Instructors can view their courses exactly as a student does by using a student account the system generates for them. To learn more, see [Administrator: Student Preview](#) | [Instructor: Student Preview](#).
