Blackboard® LEARN

The Blackboard® Learn Offline Guide

Giving learners access to critical content within Blackboard® Learn anytime, anywhere

Today's learners are constantly on the go and rely on their mobile devices to stay informed, organized, and connected. So what happens when reliable internet access is nowhere to be found?
Breaking down learning barriers

To ensure that students and learners can truly stay connected to their learning environments no matter where they are, we've introduced offline capabilities to the Blackboard Learn app. Now, students and learners have continuous access to their critical content anytime, anywhere.

Quick tip

Use the "Auto-sync" tool to automatically download files when connected to a network. This will ensure the latest content is available when offline. Select "WiFi only" to save data.
A better learning experience

- **Increased availability:** Access content 24x7, regardless of connectivity

- **On-the-go learning:** Access content on a plane, train, or anywhere in between

- **Reduced data usage:** Download content in advance to avoid using limited data

Step 1

Download available course content

Step 2

Access content whenever and wherever you need

Step 3

Automatically sync content to stay up-to-date

■ **Learn more about enabling offline capabilities today.**
